

Welcome to the TRUSTEE Newsletter #4

We are pleased to announce the publication of the Forth issue of the TRUSTEE Newsletter!

This newsletter will be published twice a year bringing the latest news and advances of the TRUSTEE project!

First and foremost...

TRUSTEE is a 42 months Research and Innovation Project, that will last until 2025.

It kicked off in July 2022 and it gathers a consortium of 22 partners.

Utilizing Self-Sovereign technologies and with State-of-the-Art homomorphic encryption, TRUSTEE offers a socially and environmentally-aware framework for cross discipline federation of Data.

Papers

On 27th of June

Dimitra Papatsaroucha, Associate Researcher at Pasiphae Lab and Deputy Technical Manager of the TRUSTEE Project, presented remotely the paper titled "*Towards Privacy-Aware Data Federation Platforms: A User-Centric Design Approach*" at DCAI'24 - 21st International Conference on Distributed Computing and Artificial Intelligence, hosted by the University of Salamanca.

The research work, carried out under the TRUSTEE Project, focused on integrating user-centric design principles into the development of privacy-aware data federation platforms discussing end-users' requirements that may include assurances of privacy and the ability to maintain control over multidisciplinary data exchange for the primary and secondary use of their data - among others - and highlighting the significance of prioritizing user empowerment for creating a solution that is both easy to use and user-driven. The paper was presented under the "Special Session on Intelligent Internet of Things Security and Privacy (WISP)".

12.20

Multi-level privacy preservation
for data federation

Dr. Evangelos Markakis
Hellenic Mediterranean University

The **Fujitsu event**, organized by Fujitsu Luxembourg, took place on the second day of the 5th Plenary, on the 16th of May

The Fujitsu event featured the "**Embracing AI & Data Space**" session, which provided deep insights into the areas of AI security.

Among the highlights was the presentation on "**Multi-level Privacy Preservation for Data Federation**" from Assist. Professor Evangelos Markakis the Principal Investigator of Pasiphae Lab and technical manager of the TRUSTEE project. Christoph Endres, Sofiane Lagraa, and Ouedraogo Moussa also delivered interesting speeches.

We are thrilled to announce that we received positive responses from Innovation Radar regarding the 'Highlighting Excellent Innovations' initiative for our partners: **Tecnalia Research & Innovation, RINA, and Adrestia R&D.**

We are excited to announce the launch of a series of interviews with the pilot leaders of the TRUSTEE project, now available on **TRUSTEE's YouTube page!** In these videos, representatives from Athena Research, Check Watt, and Tecnia share fascinating insights and behind-the-scenes details about their contributions to the project. Learn about the innovative approaches they are taking and the impact their work is having on the project's success.

In addition to these, we have also started a series of interviews with the **TRUSTEE** partners on **LinkedIn!** The first interview features our Technical Management Team from Pasiphae Lab and Hellenic Mediterranean University.

TRUSTEE
TRUST AND PRIVACY-PRESERVING COMPUTING PLATFORM
FOR CROSS-BORDER FEDERATION OF DATA

1. BRIEFLY DESCRIBE YOUR ORGANIZATION!
The Hellenic Mediterranean University (HMU) is a new, qualitative, extroverted Public Educational Institution with a strong international presence, a member of the ATHENA European University and established in May 2019 in the place of the former Technological Educational Institute of Crete that was founded in 1983. In TRUSTEE, HMU participates with the Pasiphae Group of the Laboratory of Multimedia, Networks, and Communications, which has a long record in national and EU-funded projects.

2. WHAT IS YOUR ROLE IN TRUSTEE?
HMU is leading the Technical Management of TRUSTEE alongside Risk Management & Quality Assurance. HMU is also the leader of the TRUSTEE Pan-European Pilot Campaign, while, in addition, it develops the primary User Interface of the TRUSTEE Platform.

3. HOW DOES YOUR EXPERTISE CONTRIBUTE TO THE OVERARCHING GOALS OF THE TRUSTEE PROJECT?
HMU contributes to the consortium through its expertise in technical coordination, risk management and quality assurance, user-centered and technical requirements extraction, best practice benchmarking, pan-European pilot campaign plan design, and more.

Don't miss out on these engaging interviews – head over to our YouTube page and LinkedIn to watch them now!

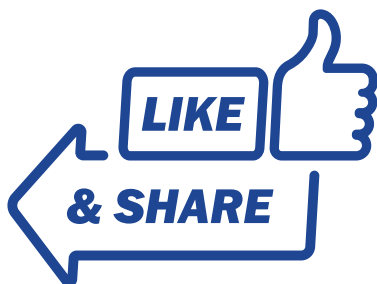

Next Issue

TRUSTEE will be at the European Big Data Value Forum (EBDVF) in October for the second year in a row.

On our social media pages, you will find the latest updates on the project!

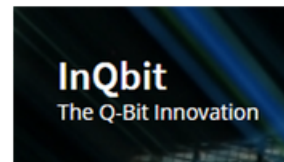

And much more to come in TRUSTEE's fifth newsletter!
